COMMUNITY INFORMATION UPDATE: Community Water System

The Village of Granisle would like to advise our residents that we have retained a third party company to conduct an assessment of our water treatment facility. The company has begun work (week of April 7), with an anticipated timeline of five weeks.

The Village continues to work closely with Northern Health throughout this process, continuing to advise them of all plans moving forward, including any additional testing that may be required during the assessment phase.

We will provide updates as they become available for public release and would like to thank our residents for their understanding and patience during the difficult water challenges we have faced.

All efforts remain focused on resolving the issues at the Water Treatment Plant and meeting Northern Health's requirements to rescind the Do Not Consume.

With Respect, Mayor and Council
